Highlights

Manuscript: Is Wireless Security Ready for the AI Era? Evidence from a Curated Corpus of 130 Studies, 2020–2026

Article type: Review Article — IET Communications

- Scoping review classifies 130 studies of AI in wireless-link security, 2020–2026
- Core corpus of 121 studies: 84 defense, 30 threat, 7 dual; plus 9 PQC stratum rows
- Threat studies validate on testbeds (16/30); defense evaluation is simulation-heavy
- Verified artifact releases are rare: 4 of 121 core studies (3.3% lower bound)
- Released per-study dataset lets independent coders audit, correct, or extend claims
