Declarations

Item	Details
Manuscript title	Is Wireless Security Ready for the AI Era? Evidence from a Curated Corpus of 130 Studies, 2020–2026
Article type	Review Article
Journal	IET Communications
Authors	Hussain Touhid Siddiquee (ORCID iD 0009-0002-8804-6195); Md. Abul Malek Fahim (ORCID iD 0009-0009-4196-4328)
Affiliation	Leading University, Sylhet, Bangladesh (both authors)
Corresponding author	Hussain Touhid Siddiquee — touhidsiddiqueeraj@gmail.com
Date	13 October 2026

Funding

No specific funding was received for this work.

Conflicts of interest

The authors declare no conflicts of interest.

Author contributions

Hussain Touhid Siddiquee (correspondence: touhidsiddiqueeraj@gmail.com) performed 100% title/abstract screening, full-text eligibility review, charting, coding, formal analysis, and drafting; Md. Abul Malek Fahim independently reviewed and validated the coding decisions and all derived results, and both authors are in agreement with the reported findings; two independent verifiers performed corrective verification checks on a 22-record sample. Both authors read and approved the submitted manuscript.

CRediT authorship contribution statement

Hussain Touhid Siddiquee: Conceptualization, Methodology, Investigation, Data curation, Formal analysis, Software, Visualization, Writing – original draft, Writing – review & editing.

Md. Abul Malek Fahim: Validation, Investigation, Writing – review & editing.

Roles follow the Contributor Roles Taxonomy (CRediT). The validation role reflects an independent review of coding decisions and derived outputs; it is not a blind second coding, and no agreement statistic is claimed.

Data availability

The classified corpus (dataset_papers.csv), screening log, retrieval records, and analysis scripts accompany this submission as an anonymized supplementary archive (mirrored on an anonymized hosting service for review); a public repository will be named only upon acceptance.

Code availability

Coding and figure-generation scripts are included in the supplementary archive and rerun from the released dataset; check_consistency.py gates export.

Ethics approval and consent to participate

Not applicable. The study is a review of published literature and involved no human participants or animals.

Use of artificial intelligence

AI assistance was limited to candidate pooling, prose drafting, and copy-editing; no screening, coding, counting, or verification decision was delegated to AI, and all counts were computed programmatically from the released dataset under human control (first-author coding; second-author validation; independent verifier sample; no blind κ claimed). Every record carries a resolvable identifier verified against Crossref, arXiv, ACM, or USENIX; no identifier was fabricated or shared. The authors take full responsibility for the content.

Acknowledgements

None.
