IET Communications — Submission Checklist

This checklist maps the files in this package to a submission of the manuscript “Is Wireless Security Ready for the AI Era?” to IET Communications (published by Wiley). Complete the actions in section 3 before uploading; nothing else in the package requires editing.

1. Journal and submission route

- **Journal:** IET Communications — journal home at https://ietresearch.onlinelibrary.wiley.com
- **Submission system:** ScholarOne Manuscripts — follow the “Submit an article” link on the journal home page (the journal's ScholarOne site has historically been at https://mc.manuscriptcentral.com/iet-com)
- **Article type:** Review Article (select the journal's review category)
- **Initial format:** many Wiley/IET titles accept free-format initial submissions; this manuscript uses a clean single-column layout with numbered corpus-ID citations, so confirm against the current Author Guidelines

2. File-by-file upload map

ScholarOne slot	File in this package	Notes
Main Document	01_Manuscript_IET_Communications.docx	Editable file; the matching PDF is provided for reference and for systems that accept PDF at first submission
Cover Letter	02_Cover_Letter_IET_Communications	Attach the file or paste its text into the cover-letter field, as the system allows
Declarations / Conflict of Interest	03_Declarations_IET_Communications	CRediT roles, funding, conflicts, data availability, ethics, AI-use disclosure
Highlights (if the form has this slot)	04_Highlights_IET_Communications	Five bullets of 85 characters or fewer each
Suggested Reviewers	05_Suggested_Reviewers_IET_Communications	For reference — enter names and verified emails directly in the system
Supplementary Material	07_Supplementary_ScholarOne_Upload.zip (assembled from the 07_Supplementary folder)	Classified corpus, bibliography, and analysis scripts; the mirror route in item 3 is the default
Figures (if requested separately)	Figures/Figure_01–14 (300 dpi PNG)	All 14 figures are also embedded in the manuscript

3. Before you submit — actions for the authors

1. **Enter author details in ScholarOne.** The title page carries the affiliation and ORCID iDs; mirror them in the submission metadata for both authors: Hussain Touhid Siddiquee (corresponding author; ORCID iD 0009-0002-8804-6195) and Md. Abul Malek Fahim (ORCID iD 0009-0009-4196-4328), both — Leading University, Sylhet, Bangladesh.
2. **Link ORCID iDs.** Enter both ORCID iDs and link the corresponding author's iD (0009-0002-8804-6195) to the submitting account, as required for corresponding authors.
3. **Decide the supplementary route.** The Data Availability statement describes an anonymized supplementary archive mirrored on an anonymized hosting service; that mirror is the default route — confirm it is live before submitting. If you prefer to upload Supplementary Material directly, assemble the complete archive first: the 07_Supplementary folder provides the classified corpus, bibliography, and analysis scripts, while the screening log and retrieval records come from the full research archive.
4. **Answer the AI-use question consistently.** If the form asks about AI-generated content, answer in line with the manuscript's disclosure: AI assistance was limited to candidate pooling, prose drafting, and copy-editing, with no screening, coding, counting, or verification decision delegated to AI.
5. **Verify reviewer details.** Confirm each suggested reviewer's current email and affiliation from institutional pages before entering them, and exclude recent collaborators.
6. **Check current guidelines.** Confirm article-type definitions and any length or figure-format requirements in the journal's current Author Guidelines before final upload.

4. Manuscript facts at a glance

Item	Detail
Manuscript length	41 pages, approx. 13,900 rendered words including references and appendix
Figures / tables	14 figures (300 dpi PNG) and 15 numbered tables plus appendix Table A1
Citation style	Corpus IDs (e.g. [T30]) keyed to the released classified dataset
Peer review model	Single-anonymized for most IET titles — author names remain on the manuscript; verify under the journal's policies
